- Skills -

Languages: [JavaScript, Python, HTML, CSS]

Frameworks / Libraries: [React, Redux, Express, Node, Flask, TailwindCSS]

Databases: [SQL, PostgreSQL, Sequelize, SQLAlchemy, Alembic]

Tools: [Bash, Git, AWS S3, Heroku, Docker]

Operating Systems: [Windows, Linux: (Debian / Arch based Distros)]

- Projects -

Anvil Editor

[Live Site](#) | [GitHub](#)

Python / Flask, JavaScript, React / Redux, Docker, CSS, TailwindCSS, PostgreSQL,

A text editing / file storage platform designed to appeal to developers and people who love a CLI aesthetic.

- Refactored a previous project changing the backend from Express to Flask to implement a newly learned technology.
- Architected an improved redux store improving the speed of feature development.
- Thoughtfully produced a UI with reusable React components to deliver a consistent look, theme, and feel.

Blueprint

[Live Site](#) | [GitHub](#)

Express / Node, JavaScript, Pug, CSS, PostgreSQL

Remember the Milk clone for organizing todo lists and projects.

- Implemented a variety of AJAX requests handling HTML injection to create the smooth single page application experience.
- Designed and implemented clear and usable express routes to accomplish dynamic Pug HTML template rendering.
- Collaborated with team members to solve difficult bugs ensuring the application was ready to launch on time.

Bad Reads

[Live Site](#) | [GitHub](#)

Express / Node, JavaScript, Pug, CSS, PostgreSQL

An app inspired by Good Reads for people who like books so bad they're good.

- Developed clear and efficient queries with PostgreSQL, Sequelize, and Express.
- Crafted a coding style guide to ensure consistency, clarity, and readability in the codebase for the entire group.
- Intentionally focused on solid team communication; ensuring a close working culture and reducing unnecessary mistakes.

Resume Builder

[Live Site](#) | [GitHub](#)

Python / Flask, JavaScript, React / Redux, Docker, CSS, TailwindCSS, PostgreSQL

Built to provide a simple and straightforward experience for job hunters needing to create a resume.

- Purposefully designed a consistent look and feel to achieve a pleasant user experience utilizing TailwindCSS.
- Emphasized debugging and solving issues with team members aiding the group in reaching project milestones.
- Worked with a team architecting a database to accommodate the form data required for templated resume creation.

- Experience -

Pest Control Technician | March 2016 - March 2020

Truly Nolen

- Developed friendly working relationships with customers, emphasizing customer education and satisfaction.
- Retained a state license for applying pesticide in residential and commercial areas, keeping up with industry best practices.
- Responsible for working alone and accomplishing tasks within a 100 mile radius in a self-directed and efficient manner.

Assistant Manager / Delivery Driver | March 2014 - March 2016

Dominos

- Worked with customers to ensure clear communication and expectations retaining a 4.5 star or higher rating.
- Kept an accurate count of food supply and labor for every shift I managed to ensure continued store profitability.
- Aided closing managers beyond my job description and was promoted to assistant store manager.

- Education -

App Academy | Full Stack Immersive | Fall 2020 - Spring 2021

Six month immersive software development course with a 3% acceptance rate and a focus on full stack web development. Over 2000 hours of work invested including class time, homework, and projects.
